

## OUR MISSION & PRODUCTS

To provide high-quality and reliable assessment, monitoring, reporting and verification of the true positive impact generated by corporate investments in ecosystem agroforestry and nature-based solutions. 360carbon is a data-driven digital solution, empowering corporates & businesses to transparently invest in high impact nature-based solutions in alignment with sustainability agendas and climate-action goals. Unlike other services, 360carbon provides assessment, proof of planting through the digitalization of every tree planted, with near real-time digital monitoring, reporting and verification (dMRV).

### Nature contribution through forestry projects.

Carbon removal through high quality agroforestry projects. Capture carbon dioxide in the biomass of trees as part of biodiverse orchards or woodlot forests located on farms in the Western Cape. With maximum 300 trees per ha, a mix of indigenous trees absorb 11-17 t CO<sub>2e</sub>/ha/a

Size:  
3 – 100 ha  
Costs:  
CHF 8.20/tree  
min. 1'000 required  
Duration:  
5 years  
(until survival of tree is guaranteed)  
C-Sequestration:  
Science based, annually updated C-Sequestration data per tree included  
Carbontracer Dashboard:  
Dashboard access with digital tracking of your impact included

### B2C & e-commerce solutions.

Scale your sustainability efforts with automated solutions that can plant trees for sold products or customers registered. Plant a tree for every checkout at your ecommerce. Automatic, scalable, uplifting. Create awareness through time limited campaigns.

Size:  
Min. 300 – 1000 trees  
Costs:  
CHF 9.50/tree  
min. 300 trees required  
Duration:  
5 years  
(until survival of tree is guaranteed)  
Carbontracer Dashboard:  
Digital tracking of your impact can be customised to your specific requirements and marketing strategy.

### Carbontracer® Forestry & ecosystem Software.

Capture existing forests, new forests or ecosystems with our Carbontracer software to make your efforts public and transparent. Receive audited data easy readable for your stakeholders in one dashboard.

Costs:  
Annual Software licence:  
Dashboard CHF 1600.-/a  
App CHF 800.-/a  
Duration:  
Min. 1 year

Support with data capturing or customized reportings can be provided.
